

**New Methods in TalkBank**  
**Workshop Preparation Guidelines**  
Davida Fromm -- fromm@andrew.cmu.edu

To facilitate your participation in this workshop, please be sure to take these steps in advance.

1. Download CLAN from <https://dali.talkbank.org/CLAN>
2. Download the MOR grammar for English. In the CLAN program menu, go to FILE, select Get MOR Grammar, and then select English. The **eng** folder will automatically download to your Desktop in a folder named MOR.

3. Check that the *mor lib* directory in the CLAN Commands window is set to where the **eng** folder is located on your desktop (see green arrow below). This should happen automatically. To view the CLAN Commands window, type Command-D (Control-D on a PC) or go to WINDOWS in the CLAN menu and select Commands. If the **eng** file location is not correct, click on the *mor lib* button, navigate to the folder, and double click on it.

4. Download and unzip the Examples files from <https://talkbank.org/examples.zip> . For my presentation, I have that **examples** folder on my desktop and I set my working directory to that folder (see blue arrow above). You can do this also by clicking on the button that says *working*, navigating to **examples** folder, and then double clicking on it.
